STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/ 2/

Total stocks of leaf tobacco lower than a year ago.

Leaf tobacco inventories of dealers and manufacturers in the United States and Puerto Rico totaled 4,480 million pounds as of October 1, 1971. This was a decline of 170 million pounds from the 1970 October level. Growers marketed around 730 million pounds during the third quarter, mostly flue-cured.

The marketing year for all kinds of tobacco, except flue-cured and cigar wrapper, is on an October-September basis. The indicated total combined disappearance (exports plus domestic consumption) for all U. S. types during the 1970-71 marketing year was 1,930 million pounds compared with 1,961 million the previous year. Domestic manufacturers used approximately 266.9 million pounds of imported tobacco during the past fiscal year--181.3 million pounds of cigarette leaf and 85.6 million of cigar. Exports of U. S. leaf during the 1970-71 marketing year totaled 639 million pounds compared with 640 million in 1969-70.

Stocks as of October 1, 1971 included 1,263.9 million pounds of leaf tobacco under Government loans. These loan stocks were divided as follows:

flue-cured	775.8 million pounds
burley	463.4 million pounds
fire-cured	5.7 million pounds
dark air-cured	14.3 million pounds
cigar leaf	4.7 million pounds

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks. (See tables in body of report for reported weight basis). This report is issued quarterly.

2/ All Government loan stocks are reported by Grower Cooperatives, which are considered dealers for stocks-reporting purposes.

Burley stocks higher; Flue-cured, Maryland, imported cigarette and smoking leaf decline.

Flue-cured stocks on October 1, 1971 at 2,314 million pounds were 96 million below the level of a year ago. Marketing of the 1971 crop, currently estimated at 1,102 million pounds, began in July and by the end of September 711 million pounds had been sold.

Burley stocks were 1,345 million pounds this October 1 compared with 1,343 the year before. Total disappearance during the past marketing year amounted to 557 million pounds. Exports were 54 million pounds leaving a residual domestic consumption of 503 million.

Inventories of Maryland tobacco fell to 51.8 million pounds, the lowest October figure since 1946. Disappearance during the 1970-71 marketing year was 40.1 million pounds. With exports at 11.8 million pounds indicated domestic usage was 28.3 million pounds.

Imported cigarette and smoking tobacco leaf showed stocks of 367.4 million pounds, a decline of 38.5 million.

DARK TOBACCO STOCKS

All types show declines.

Fire-cured tobacco stocks, reported at 62.2 million pounds were 11.4 million smaller than a year ago. Stocks on October 1 were divided as follows: Virginia, 9.0 million; Eastern District Kentucky and Tennessee, 45.8 million; and Western District, 7.4 million pounds. Disappearance of fire-cured during the 1970-71 marketing year totaled 48.5 million pounds, a loss of 1.2 million pounds.

1/ Types 11-37 are reported on the basis of packed weight.

2/ Farm-sales-weight equivalent based on unstemmed sweated weight factor.

3/ The instructions for reporting unstemmed cigar-leaf of the domestic types require that dealers and manufacturers indicate the weight basis on which the tobacco is reported, namely, farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of average factors reflecting the percentage reported each quarter in each of these three categories.

1/ Totals include stocks of leaf tobacco sheet. See separate reporting in table 4.

2/ Type 73 is defined as all domestic types of tobacco not otherwise classified; the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inebility of reporters to designate cuttings, clippings, and trimmings in the types to which they properly belong.

3/ In previous quarters these tobeccos were grouped together and designated type 90. The increasing volume of imported flue-cured and burley leaf made separate reporting necessary.

1/ Totals include stocks of leaf reported in tobacco sheet. See separate reporting in table 4.

2/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1970, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

3/ Subject to revision.

4/ For explanation of stocks included in this classification see footnote 2 on page 7.

5/ In previous quarters these tobaccos were grouped together and designated type 90. The increasing volume of imported flue-cured and burley leaf made separate reporting necessary.
